

CAR SHOCK ABSORBERS

CATALOGUE 2020 - 2021

KONI CAR SHOCK ABSORBER PROGRAM

Welcome to KONI, one of the world's leading manufacturers of shock absorbers. This catalogue gives an overview of the many possibilities for customization and personalization of your car. Ever since 1955, KONI has held a prominent position in motor sports with its range of state-of-the-art shock absorbers and sport kits. All rely on KONI's longstanding experience!

STR.T

TUNED PERFORMANCE DAMPING AFFORDABLY PRICED

- Perfect for OE Replacement or Vehicle Improvement
- Entry-Level Performance Shocks and Struts
- Product Complements OEM or Performance Lowering Springs
- Non-Adjustable Damping

KONI's entry-level performance STR.T (pronounced "street") shocks and struts bring improved handling and KONI quality to the budget-minded driving enthusiast. Whether to simply refresh and upgrade a factory equipped original vehicle, or to match with street performance lowering springs and other modifications, KONI STR.T provides performance at a value price point.

STR.T Damping Force Comparison

STR.T KIT

PERFORMANCE LOWERING & HANDLING UPGRADE ONE PURCHASE, ONE INSTALLATION

- Perfectly Tuned Chassis / 100% Performance
- Excellent Handling
- Lowering up to 40mm with H&R Spring
- Perfect Match
- 100% Street Legal

The STR.T Kit from KONI comprises KONI STR.T shock absorbers and custom-made lowering springs from the company H&R. KONI's STR.T shock absorbers give you perfect road holding, optimum handling and breathtaking forces. Thanks to the extremely high reaction speeds of the shock absorbers, drivers can totally rely on their equipment, even in precarious or demanding situations.

SPECIAL & CLASSIC

IMPROVED RIDE AND HANDLING PERFORMANCE
REBOUND DAMPING ADJUSTABLE

- The Shocks That Earned KONI's World-Class Reputation
- Red (Special), Black or Red with KONI Winged Logo (Classic)
- Broad Application Range Including Older Performance Cars
- Use for Replacement and Vehicle Upgrade

KONI Special and Classic shock absorbers are available for many older performance cars. KONI selects the most appropriate damper technology and develops every shock absorber specifically for each application to bring out the best possible ride and handling. KONI Special and Classic continue to be the industry standard for older performance cars.

SPECIAL ACTIVE

IMPROVE HANDLING WITHOUT COMPROMISING COMFORT

- Special Active Applications Utilize Koni's Latest Generation of Frequency Selective Damping Technology
- Improves Safety and Road Holding
- Performance for Driver and Comfort for Passengers in One
- Technology Proven on Over 2.0 million Factory Equipped Vehicles

KONI Special ACTIVE is the next generation of premium shock absorbers that offer superior handling without compromise. Utilizing the most recent generation of Koni's patented Frequency Selective Damping technology, it controls large body motions and cornering forces but smooths expansion joints and rough roads for improved comfort.

Special ACTIVE Damping Range

SPORT

LEGENDARY HANDLING & CONTROL

EXTERNAL REBOUND DAMPING ADJUSTMENT ON MOST CARS

- Streetable Ride Quality and Corner Carving Handling Control
- Excellent Choice for Multi-Use Cars (Street, Track, etc.)
- Best KONI Shock for All Performance Lowering Springs
- Double Adjustable and Race Valved Versions Available for Key Applications

KONI Sport struts and shocks are the industry leader for user-adjustable damping for daily drivers to weekend warriors. For decades, KONI Sport's familiar yellow color has meant superior motion control and adjustability for the discerning driving enthusiast.

SPORT Damping Force Comparison

SPORT KIT

MATCHED ADJUSTABLE DAMPERS & LOWERING SPRINGS PERFORMANCE SUSPENSION EXCELLENCE IN ONE BOX

- Optimized Street or Track Performance
- Aggressive Roadholding and Improved Safety
- Engineered Kits for Specific Vehicle Applications
- Complete Shocks Kit Consisting of Four KONI High-Performance Car Shock Absorbers and Matching Lowering Springs.

Are you a tuner? Do you like high speed? Are you impressed by professional skills and a dynamic sporting driving style? Then we have the right tool for you!

Our Sport shocks kit provides the ultimate shock absorber technology by KONI. This means that you can have even better roadholding, less chassis movement and performance support without limits. Show what you've got and experience the unique driving dynamics with optimum safety!

KONI | H&R TRACK DAY KIT

F1 TECHNOLOGY TAKES YOU TO THE LIMIT

- Aluminum Top Mount with Scalable Camber Adjustment
- Fully Independent Rebound and Bump Adjustability
- No Need for a Remote Reservoir

In the early 90's KONI introduced a new damper technology in Formula 1, which has since been used in many other race classes. This technology is still being used today in F2, GP3, Formula 3 and many other GT Series. KONI is now introducing this F1 technology in the KONI | H&R TRACK DAY KIT: perfect for track days as well as for fast road use.

When deciding which strut design to be used for the TrackDay kit suspension, KONI has chosen the up-side-down configuration of a mono tube damper. This configuration allows a very high side load, combined with a very solid damper setup; a must when it comes to real race dampers. The KONI mono tube dampers offer eight adjustment positions in both rebound as well as bump, which are all easily adjustable and felt by distinct stops, or clicks, to assure that each port in the valve preloaded port system can only be either open or closed. Each of these positions will give a noticeable and repeatable damper curve change. The wide adjustment range gives you the option to tune your car to the maximum setup for both road as well as track day use in a matter of seconds!

HEAVY TRACK & RAID

ROBUST CONSTRUCTION IMPROVED ROAD HOLDING

- KONI Special Technology, Up-Sized for 4x4s and pick-ups
- RAID: Extreme Durability Proven in the World's Toughest Conditions
- Heavy Track: Improved Handling and Ride for Big Vehicles
- Mono-Tube or Twin-Tube Design Based on Application

KONI RAID and Heavy Track are specially developed for the on-road and off-road challenges of pick-ups, 4x4s, and SUVs. Tested and used under the world's most extreme conditions, these KONI dampers satisfy the highest demands regarding safety, stability and road holding grip. For many years, KONI RAID shocks have been the damper of choice for many Dakar Rally racers and support vehicles in Africa and South America where performance, strength and safety are paramount. KONI RAID shocks served their duty on BBC TV's Top Gear North Pole Special and driving up an Icelandic volcano. African Jungle or Urban Jungle, KONI RAID and Heavy Track are ready for the challenge.

ADJUSTMENT PROCEDURES

SERIES 26, 30*

1. Move the dust cover and the plastic or metal cover on the end of the damper body to expose the adjusting button (Figure 1).
2. Hold the damper body securely in one hand near where the piston rod emerges from the body or use a vise/clamp carefully only at the lower attachment only. With the damper fully extended, press and hold the adjuster button with one finger while turning the piston rod with your other hand (Figure 2).
3. The adjusting device has been provided with a number of clearly distinguishable stops (clicks), each of which marks an adjustment position for 26 series (zero + 2 clicks = 3 positions) and 30 series (zero + 3 clicks = 4 positions) (Figure 3).
4. Prior to making a new adjustment, confirm if the damper is in the zero position or has been adjusted previously by turning the piston rod to the left (counter clockwise) until the zero-stop is felt. DO NOT USE FORCE or adjuster damage may occur.
5. To increase rebound, turn the piston rod one or more clicks to the right (clockwise), and release the adjusting button.
6. Be sure the adjusting button fully springs back into position. As long as the button is depressed, do not turn the piston rod further; otherwise correct adjustment will be disturbed. As soon as the button has made its complete return, the piston rod may be turned freely. The damper can now be refitted.

NOTE: 26 Series range limited to 2 clicks, 30 Series range limited to 3 clicks.

Figure 1

Figure 2

Figure 3

ADJUSTMENT PROCEDURES

SERIES 80, 82, 86, 87, 88, 90, 8040, 8240*

1. Remove the shock absorber from the vehicle and hold it vertically with the lower eye or pin attached in a vise. Use clamp plates to prevent damage.
2. Fully collapse the shock absorber, at the same time turning the dust cap or piston rod slowly to the left (counterclockwise), until it is felt that the cams of the adjustment nut engage in the recesses of the foot valve assembly (Figure 4).

* Some shock absorbers include a bump rubber concealed under the dust cover and it must be removed prior to adjusting.

3. The damper may have already been adjusted. Therefore check whether the shock absorber is in the adjustment position or not by keeping it collapsed and gently turning it further to the left counting at the same time the half turns until a stop is felt. Stop turning then and do not use force.
4. Keeping the shock absorber collapsed, make 1 half turn (180 degrees) to the right (clockwise). In case of prior adjustment add the number of half the turns previously found. The total range is about 4-5 half turns, we suggest the MAX crank of 4 (Figure 5).
5. Pull the shock absorber out vertically without turning for at least 1 cm to disengage the adjusting mechanism. The dust cap or piston rod may now be turned freely.

SERIES 3013, 8010, 8041, 8210, 8241, 8610, 8641, 8710, 8741

1. Almost all KONI externally adjustable dampers are quickly and easily adjusted by placing a KONI knob on the adjuster tab that sticks out of the top mounting threading. As shown on the knob, turn counter clockwise for firmer, clockwise for softer (Figure 5).
2. Some externally adjustable shocks use an adjuster window instead of a tab. Insert a pin through the window into a hole, sweeping from left to right for firmer, right to left for softer.

***WARNING:**

Adjust both left and right dampers identically. Failure to do so may lead to unstable handling and uneven tire tread wear.

MISCELLANEOUS INFORMATION

ORDER NUMBERS EXPLANATION

The given numbers help to find the right shock absorber types. The part number consists of a construction group number referring to the type of construction of the shock, and a reference number referring to the shocks application.

In some cases the reference number contains an "L" or "R" (Left or Right side). Yellow shock absorbers have the extension "SPORT". Specially built shocks have different extensions, for example "SP", or "SPD," or "SPA" and "SPX" (4WD). The numbers on the right refer to a yellow complete McPherson strut, twin-tube with low-pressure gas, sport version, construction Type 8741. In this case for a BMW E46 M3, front axle, left. The rebound damping is externally adjustable.

Example Order Number:

8741	1438L	Sport

MISCELLANEOUS INFORMATION

ATTACHMENTS KONI HEAVY TRACK & RAID

Due to the build quality and endurance a KONI HEAVY TRACK or KONI RAID shock absorber may outlive its attachment rubbers and bushings.

Replacement parts are available, please contact your KONI reseller or distributor for details.

SPORT SHORT

When do you need a shock absorber with shortened stroke? If a damper with shortened stroke is needed, please contact your KONI reseller or distributor for possibilities.

Lined writing area with alternating light gray and white horizontal bands.

A series of horizontal lines for writing, spanning the width of the page.

GLOSSARY

GLOSSARY

GB

ATTACHMENTS

bushing kits
brackets
top/bottom
with bushing length ...mm

ALTERNATIVE

-for average loads
-for extremely heavy loads only
-for sports drivers
-shock absorber type for extremely bad road conditions

SUSPENSION

lowered suspension
only for models without anti-lock brake system
lowering the car approx.
complete suspension kit
with leaf springs
with coil springs
self levelling unit
with air suspension
adjustable (lower) spring seat
externally adjustable damper type
for non-sealed struts (McPherson housings) only
single/double joint rear axle
rigid/solid rear axle
with independent rear suspension
with front dampers behind axle
with anti-roll bar bracket
Distance between lower mounting bolt in bracket and center of struthousing.
With/without dent in housing to clear the tire
Torsion bar

MISCELLANEOUS

only for cars with plastic cover on top of the upper attachment (40/80 mm Ø)
up to/as from chassisno.
up to average loads only
except cars equipped with ...
befote fitting dampers have to be adjusted one full turn
see NOTE below
on request only
old/new reference number

GLOSSAIRE

F

FIXATION

attaches
ferrures
dessus/dessous
avec douilles de fixation longueur. ...mm

ALTERNATIVE

-pour charges moyennes
-pour charges très élevées
-pour conduite sportive type d'amortisseur pour des revêtements en très mauvaise condition
-ressorts hélicoïdaux renforcés pour des charges élevées.

SUSPENSION

suspension surbaissée
seulement pour modeles sans système de freinage anti-blocage
véhicule surbaissé d'environ
kit de suspension complet
avec ressorts à lames
avec ressorts hélicoïdaux
amortisseur auto-nivellant
avec suspension pneumatique
coupelle de ressort inférieure ajustable
amortisseur réglable de l'extérieur
pour jambes de force McPherson non-serties seulement transmission a cardan simple/double
essieu raide AR
avec suspension indépendante à l'arrière
avec amortisseurs avant situés derrière l'essieu
avec ferrure de barre stabilisatrice
Distancer entre le boulon de fixation inférieure du brss de fixation et l'axe de la cage McPherson.
Avec/sans cavité dans la cage McPherson pour le libre roulement du pneu.
Barre de torsion

DIVERS

seulement pour voitures avec capuchon en matière plastique sur l'attache supérieure
jusqu'au/à partir du No. Chassis
jusqu'aux charges moyennes
exceptés les modèles équipés avec...
régler les amortisseurs un tour avant montage
voir NOTE ci-dessous
sur demande seulement
référence ancienne/nouvelle

WÖRTERVERZEICHNIS

D

BEFESTIGUNGEN

Befestigungsteile
Anbauteile
oben/unten
mit Hulsenlänge. ...mm

ALTERNATIV

-für durchschnittliche Beladungen
-nur für schwere Beladungen
-für Sportfahrer
-Stossdämpfertyp bei sehr schlechten Strassen decken

RADAUFHÄNGUNG

tiefergelegtes Fahrwerk
nur für Modelle ohne Antiblockiersystem
Fahrzeugtieferlegung um ca.
kompletter Fahrwerk-Kit
mit Blattfedern
mit Schraubenfedern
volltragendes Element
mit Luftfederung
einstellbare untere Sitz (Federteller)
Von aussen einstellbare Dämpfertyp
Nur für verschraubte Federbeine (McPherson-Behälterrohr)
einfache/doppelte Gelenk-Hinterachse
starre Hinterachse
mit Gelenkachse hinten
mit vorderen Dämpfer hinter der Achse
mit Stabilisator-Halter
Der Abstand zwischen dem unteren Bolzen des Befestigungsbugels und Mitte des Federbeines.
Mit/ohne seitliche Abflachung im Federbein für den Freilauf des Reifens.
Drehstab

VERSCHIEDENES

nur für Fahrzeuge mit Kunststoffkappe auf der oberen Befestigung
bis/ab Fahrgestellnr.
nur für durchschnittliche Beladung
ausgenommen für Fahrzeuge mit ...
vor Einbau müssen die Dämpfer um eine volle Umdrehung eingestellt werden
siehe unter "NOTE"
nur auf Anfrage
alte/neue Dämpfernummer

- R7 bottom groove 15 mm lower

Note for BMW 3-series E30 up to August 1988 with "M-Technik"

If equipped with "M" sportpack (Bilstein), the following original parts are required to fit the KONI insert: Bumpstop part no. 31-331-124-449, Dustcover part no. 31-331-134-314 (31-331-124-510), Locking nut part no. 31-321-115-398 (McPherson housing Ø 45 mm) or Locking nut part no. 31-321-117-376 (McPherson housing Ø 51 mm).

Axle loads

In order to choose the correct KONI STR.T KIT or KONI SPORT KIT with the correct characteristics and amount of lowering for your vehicle, maximum axle loads as indicated by the vehicle manufacturer may be of importance. Maximum axle loads are in some countries mentioned on the vehicle documents, but can also be found in the car itself. Every vehicle carries a vehicle identification plate (metal plate or sticker), usually located in the engine compartment or on a door sill. Various information and weights are shown, needed are the fields marked with "1" and "2":

1 - Maximum front axle load

2 - Maximum rear axle load

	FORD	
5	e13*2001/116*0144	
1	*WFOXXXGCDW4T701678	
Q	1880	kg
1Q	3180	kg
AN	1 995	kg
23	2 1060	kg
S	DA3	1.77

Important kit notes

- 1 The amount of lowering will be reduced on vehicles fitted with Original Sport Suspension /OEM
- 2 The lowering of the front axle depends on the vehicle specification and weight of the engine.
- 3 For fine tuning, please refer to the original Daimler Benz spring isolators available in different heights (8-23mm).
- 4 A TÜV certificate is necessary despite ABE for vehicles with a 'load dependant' brake power distributor.
- 5 Sedan without self-leveling, Estate/Station Wagon/Combi with self-leveling.
- 6 Additional lowering may occur on vehicles equipped with automatic transmissions.
- 7 Not for Station Wagons/Combi/Estates
- 8 Up to 8.79 please use spring seat no. 171412341A.
- 9 Excludes 4-wheel drive
- 10 As of 9.94 original Volkswagen springs seats might be necessary: 1H0412341 (big) or 357412341 A (small).
- 11 Not suitable for Serial/Original Sport Suspension (OEM)
- 12 Front springs only, torsion bars on the rear axle.
- 13 All wheel/tire combinations are allowed which have been approved by the ABE or other certified Wheel Testing Institutes (Germany, Austria, Switzerland).
- 14 If RH drive shaft diameter is bigger than 42 mm and when lowering 40 mm or more, the RH driveshaft may foul the anti-roll bar. If so you will need to fit a modified anti-roll bar or a longer steering rod from your VW/Audi dealer.
- 15 Excludes self-leveling.
- 16 Front & rear dampers are externally adjustable
- 17 Front dampers are externally adjustable
- 18 Rear dampers are externally adjustable
- 19 Rear dampers must be removed from car before they can be adjusted
- 20 excl. Cooper "S"
- 21 Front: threaded housing with adjustable spring seat
- 22 Rear: threaded housing with adjustable spring seat
- 23 Rear: ride height adjustable (adapter)
- 24 Rear: not ride height adjustable
- 25 With cars up to 5.92 the upper attachment must be replaced by BMW part number 31.331.090.467
- 26 Will be discontinued when current stock is depleted
