BRAKE PADS FOR ROAD & STREET

EXCELLENT PERFORMANCE BEHAVIOR FOR STREET CARS

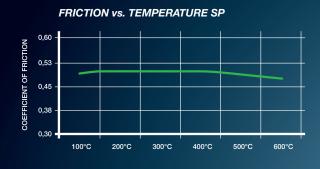

HIGHEST SAFETY DUE TO INNOVATIVE RETENTION SYSTEM

DEVELOPED FOR STREET USE

APPLICATION RANGE

High performance brake pads for road and street. Due to excellent performance and modulation characteristics also applicable on track days. The friction compound was approved on the race track and on the Eifel streets.

DESCRIPTION

STREET+ by PAGID Racing features sportive allround characteristics for street cars. This dedicated compound development maintains a constant high performance level over a wide range of temperatures.

PAGID RACING STEEL BACKING PLATE DESIGN

Similarly to PAGID Racing brake pads, STREET+ by PAGID Racing employs a dual retention system, with an adhesive bond and a unique mechanical system.

The mechanical system on STREET+ by PAGID Racing consists of a crimped backplate interface to friction material, ensuring an enhanced bonding between friction material and the backplate. UNIQUE DOUBLE RETENTION SYSTEM WITH KNOW-HOW TRANSFER FROM RACING

FRICTION MATERIAL IS MECHANICALLY FIXED TO THE BACKPLATE

NO DELAMINATION OF FRICTION MATERIAL FROM STEEL BACKPLATE
